📊 INSTITUTIONAL PORTFOLIO RISK & PERFORMANCE DASHBOARD

Malaysian Equity Analysis (2021–2026)

📖 How to Use This Dashboard

Page 1 - Performance

Track individual stock performance against the **KLCI benchmark** to evaluate overall market trends.

Page 2 - Risk Analysis

Analyze the **risk–return tradeoff** using scatter plots and sector allocation tree maps.

Page 3 - Insights

Review key findings, portfolio evaluation, and investment takeaways derived from the analysis.

Key Metrics Explained

1) CAGR (Compound Annual Growth Rate)

Average yearly return over the investment period.

2) Volatility

Annualized price fluctuations used as a measure of investment risk.

3) Sharpe Ratio

Risk-adjusted return metric measuring return earned per unit of risk.

(Higher values indicate better efficiency.)

📊 PORTFOLIO EXECUTIVE SUMMARY

- 5-Year Average CAGR: -2.0% (Portfolio lost value)
- Average Volatility: 63.85% (High-risk portfolio)
- Average Sharpe: -19.29% (Risk not rewarded)
- Only 2 of 6 stocks had positive Sharpe (Maybank, TNB)
- Market (KLCI) returned just 1% over 5 years

🏦 SECTOR PERFORMANCE

- Banking: Mixed (Maybank +11%, Public Bank +2%)
- Consumer: Negative (Nestle -6%)
- Gaming: Severe losses (Genting -28%)
- Utility: Strong (TNB +8%)
- Market: Flat (KLCI +1%)

🏆 BEST PERFORMER: MAYBANK (+11% CAGR)

- Sharpe: 4.34% | Volatility: 177%
- Strong return but extreme volatility

⚠️ WORST PERFORMER: GENTING (-28% CAGR)

- Sharpe: -54.25% | Volatility: 57%
- Gaming sector severely underperformed

💡 KEY TAKEAWAYS FOR INVESTORS

1. Malaysian equities offered minimal returns
2. High volatility not compensated by returns
3. TNB only stock with positive risk-adjusted performance
4. Consider defensive sectors (Utilities) in flat markets
